

## CLINICAL GUIDELINE

# Retrobulbar Haemorrhage Management Guideline

A guideline is intended to assist healthcare professionals in the choice of disease-specific treatments.

Clinical judgement should be exercised on the applicability of any guideline, influenced by individual patient characteristics. Clinicians should be mindful of the potential for harmful polypharmacy and increased susceptibility to adverse drug reactions in patients with multiple morbidities or frailty.

If, after discussion with the patient or carer, there are good reasons for not following a guideline, it is good practice to record these and communicate them to others involved in the care of the patient.

<b>Version Number:</b>	5
<b>Does this version include changes to clinical advice:</b>	No
<b>Date Approved:</b>	4 <sup>th</sup> February 2021
<b>Date of Next Review:</b>	4 <sup>th</sup> February 2024
<b>Lead Author:</b>	Paul Cauchi
